## Dedication

Tangible buildings of brick and mortar must be constructed on a foundation that supports a firm cornerstone. And so it was; that when the intangible foundation of Pioneer Valley Academy was built about the firmest of cornerstones, Christ, you were asked to come and support. A life of varied roles had finally let you rest for a short 3 years of retirement at your home in Virginia, but, as you heard God call you, you left and came here to uphold His Name.

At first we'd known you only as a name signed at the end of those lengthy pre-school letters, but then we had a face to connect and it didn't take long to become acquainted. We weren't just acquaintances to you though, you made of us individual friends. It doesn't

take much thought to remember that extra special favor you did, the needed help on that English assignment, the good ideas when banquet-time came around or just the good understanding chat.

So, because of your sacrifice, and tolerance, understanding and guidance, but most of all because of your truly consistent, Christian life we dedicate this 1966-67 CITADEL to you, Mrs. Marie Ellis.

## Principal's Message

Growth is certainly an important part of the adolescent years. Not only does growth include the physical development but the mental and spiritual development as well. How interesting it is to watch each student as he "grows" from year to year.

With the teen-agers healthy appetite, physical growth usually takes care of itself. Even so, there is need to heed the good counsel we have to ensure the proper development of all the physical powers. Only as we believe that the development of the physical powers promotes a strong mind and a well balanced character, can we develop our faculties properly.

In growing, the adolescent mind is surely put to the stretch. It is not so much that the study program taxes the mind, but there seem to be so many decisions and choices to make. Before, adults used to make these decisions for you. Now, as you face adulthood, you have to begin to make them for yourself. What a task it is just to "think".

Even more important though is spiritual development. Perhaps you once believed things just because mother or dad did. Now you realize that you have to decide things for yourself. I am sure that the prayer of each faculty member is that this school year may have had a prominent part in helping you to "grow".

*H. H. Lawson*

# CONGRATULATIONS

CLASS OF

1967

*New England  
Memorial Hospital*

Five Woodland Road . Stoneham, Massachusetts . 02180

Why do people get sick? Why do they suffer pain? Why do they die? Man has asked these questions from the beginning, when he knew nothing about his body, when sickness and injury were mysterious. But, progressively, disease was recognized, prevented, and treated in a long struggle for scientific truth.

If you are giving serious thought to your career, you would be well advised to consider a future in hospitals. The prospects are unlimited.

For detailed information, please call (617) 665-1740, or write to the Director of Personnel, you'll be glad that you did.
